LinkedIn
GitHub

Final-year Digital Game Design student at Istanbul Topkapı University. Shipped 4 titles across PC & mobile. Experienced in mechanic design, GDD writing, and leading cross-functional teams under tight deadlines. Seeking a summer internship where I can contribute from day one.

CORE SKILLS

GAME DESIGN

Mechanic Design

GDD Writing

Level Design

Gameplay Systems

Playtesting

ENGINE & CODE

Unity

C#

Unreal

HTML / CSS

Java

PRODUCTION

Mobile Dev

Perf. Optimization

Rapid Prototyping

AI-Assisted Pipeline

PROJECTS

BubbleBlitz DM

Solo

Unity

Mobile / APK

Casual · Solo

Sole designer and developer — concept to APK in 7 days. Designed the level progression curve and difficulty balancing, integrated a music player as a differentiating feature, and shipped the full release independently. Demonstrated the ability to drive a mobile product from idea to launch without external oversight.

Blattodea

4-person team · Designer & Developer

Unity

PC + Mobile

Point & Click · Puzzle

Designed the core memory-object interaction mechanic — each environmental object unlocks a fragmented memory sequence, creating a non-linear puzzle structure. Handled mobile port optimization, resolving touch input conflicts and achieving stable 60fps on mid-range Android. Collaborated on level layout to guide pacing across 5 puzzle rooms.

After the Last Breath

3-person team · Designer & Developer

Unity

PC / Windows

Narrative · Atmospheric

Designed the full environmental narrative loop — built a system where interacting with in-world objects progressively reveals backstory without dialogue. Led both design and implementation: authored the GDD, scripted C# event triggers, and coordinated an AI-assisted asset pipeline (graphics, audio) — enabling a 3-person team to ship a content-rich experience.

Butik Moving

In Development · Designer & Developer

Unity

Physics · Multiplayer · Party

WIP

Designing and implementing a physics-based multiplayer party game featuring procedural arm animation and ragdoll-style character control. Built a custom rigidbody movement system to support chaotic cooperative mechanics. Integrated Unity Netcode for real-time multiplayer synchronization.

EXPERIENCE

Board Game Club — President

Istanbul Topkapı University · 2022 - 2025

Ran weekly sessions for 30+ members, organized 6 campus events, and built a curriculum around game systems analysis and player psychology. Facilitated structured playtesting of 50+ titles — sharpened ability to identify what makes a mechanic loop engaging, directly informing my design process.

EDUCATION

Digital Game Design — B.Sc.

Istanbul Topkapı Üniversitesi

2022 - 2026 (Final Year)

High School Diploma

Karaman TOBB Fen Lisesi

2018 - 2022

EVENTS & INDUSTRY

ITU Save The Jam — game jam participant (Unity)

ITU Ruin The Jam — game jam participant (Unity)

GameZone Talks — industry event attendee
